PROFESSIONAL SUMMARY

Result-driven Frontend Developer with 3+ years of experience building high-performance web applications using React.js, Redux, GraphQL, and Next.js. Proficient in writing clean, scalable code, implementing CI/CD pipelines, and delivering user-friendly interfaces. Strong team collaborator with a proven track record of delivering production-ready platforms for startups and nonprofit organizations.

ROLES AND RESPONSIBILITIES

- Developed and maintained Single Page Applications (SPA) using React.js, Redux, and modern hooks architecture.
- Integrated RESTful and GraphQL APIs into scalable React applications to ensure smooth data flow and efficient state management.
- Built server-side rendered applications with Next.js to enhance SEO and performance.
- Collaborated with UX/UI teams to translate design wireframes into responsive and accessible web interfaces.
- Migrated Angular applications to React, improving performance and maintainability.
- Followed Agile methodologies in cross-functional teams to ensure timely delivery and sprint commitments.
- Wrote unit and integration tests using Cypress and Jest, contributing to higher test coverage and reliable deployments.
- Maintained clean, modular codebases and contributed to code reviews and documentation.
- Designed multitenant, multilingual frontends using localization strategies and reusable components.

EDUCATION

Bachelor of Computer Applications (BCA)

2020 – 2023

Vikram University

Graduated with 73% overall

SKILLS

Frontend Development: React.js, Redux Toolkit, Redux Toolkit Query, React Router DOM, React Table, Context API, React Hooks, Next.js, Vite, HTML5, CSS3, JavaScript ES6+, Tailwind CSS, Bootstrap, Material UI

Backend/Integration: REST APIs, GraphQL, Axios, Node.js (basics), Firebase (Auth/Firestore)

Cloud/DevOps: AWS Amplify, AWS Lambda, AWS API Gateway, AWS EventBridge, S3, GitHub Actions

Testing: Cypress, Jest, React Testing Library, Unit/Integration Testing

Development Tools: Git, GitHub, VS Code, Postman, JIRA, Figma, ESLint, Prettier

Project Management: Agile Scrum, CI/CD Pipelines, Code Review, Branch Strategy

Currently Exploring: Micro-Frontends, TypeScript Advanced Patterns, React Native

EXPERIENCE

React Developer

Feb 2024 – Mar 2025

Declone Labs PVT LTD, Surat, Gujarat

On-site

- Developed and deployed 2+ scalable web applications, reducing load times by 35
- Automated UI test flows using Cypress, catching 70% of pre-release bugs.
- Collaborated with a team of 5 developers to design micro-frontends, accelerating feature rollout by 40
- Integrated RESTful and GraphQL APIs to handle dynamic data and improve state management performance.
- Built server-side rendered Next.js applications, improving performance and SEO for client-facing platforms.

Jr React Developer

Baelworks, Madhya Pradesh

May 2022 – Feb 2024

On-site

- Built and maintained multiple UI components using React, Context API, and Tailwind.
- Implemented API integration using Axios, React Query, and RTK Query for efficient state and data management.
- Participated in CI/CD pipeline setup and testing using Cypress, improving release cycles and code quality.

Student Intern

Sant Singaji Educational Society, Harda, Madhya Pradesh, India

Oct 2021 – Mar 2022

On-site

- Collaborated as part of a 12-member team, gaining valuable hands-on experience in software development.
- Assisted in the design and implementation of key features for internal systems and tools, learning from senior developers.
- Applied academic knowledge to real-world projects, deepening understanding of front-end and back-end technologies.
- Actively participated in code reviews, team discussions, and project planning, contributing to a positive, growth-focused team environment.
- Developed strong problem-solving skills and improved my ability to work effectively in an agile development setting.

PROJECTS

CyberStash – SOAR Module (Eclipse.XDR Platform)

Developed automation workflows in React.js for Security Orchestration, Automation, and Response (SOAR). Integrated security tools to reduce manual incident handling and improve response times.

Empowered Hub — Non-Profit Educational Platform

Built an interactive platform providing educational resources and learning tools for underprivileged students. Helped scale outreach to 1000+ students.

Singaji Central — Student Lifecycle Management System

Designed and developed a central dashboard to manage student attendance, exam results, and academic progress across institutions.

Bharosa (Admin Panel) — Agritech E-commerce System

Developed product inventory and vendor management module for a growing agritech platform.

HR Management System — Parivaar Organization

Created a secure employee management dashboard including leaves, roles, and payroll modules.

Ad-Sprint — Ad Operations Dashboard for News Agencies

Engineered a Redux-heavy frontend for creating, managing, and tracking news advertisements.

CERTIFICATIONS

React JS — [HackerRank Certified \(2023\)](#) SQL Certificate — [HackerRank Certified \(2023\)](#)

SI Associate Certification Program — [MongoDB Certified \(2023\)](#)
